Receive search query via communications network 106 from computing device 104

1100

Search image files 1012, which contain a plurality of new image files 406, to identify which of the plurality of new image files 406 have image meta-data 404 that matches the specific image-meta data associated with the search query

1102

Provide to computing device 104 via communications network 106 each of the new image files 406 that matches the specific image meta-data associated with the search query

1104
